

The Practice (page). Stg 6/E7

Name _____

Okey dokey, practice time! Look out for **place value** and the 'operation' (adding or subtracting). Take your time – are you going to 'carry' or 'borrow'? Look out for patterns – who knows what'll show up!

$$\begin{array}{r} 7372 \\ - 2787 \\ \hline = \end{array}$$

$$\begin{array}{r} 686.54 \\ + 439.87 \\ \hline = \end{array}$$

Use your maths book to see if you can solve this **addition and subtraction challenge**: (Yep, it's nasty)

Ilesha and Seb decided that they wanted to do some fundraising to save the Greater-Speckled Squawking Pink Monkey-Bird from second-hand smoking and algal blooms. Seb's mum gave them \$10 to start with, but they needed to spend \$7.50 on photocopies for advertising. After the first day they were given \$15.80, but had to buy a new bucket after their first one was crushed in a horrible tricycle accident. The bucket cost \$2.70. On the second day they went door to door and got \$23.40, but had to pay \$5.60 in bus fares. On the third day it went really well busking in town and they made \$48.20 - but had to pay \$12.50 to re-string Ilesha's ukulele. On the fourth day it was raining and they didn't raise much - only \$5.20 - but they didn't have any costs. On Friday it was still raining, so they hired a Monkey-Bird themed umbrella for \$6.40 and raised another \$34.90

In the weekend, they added up their total donation - how much money had they raised?

Handy tip: make a plan for how to keep track of the money earned and spent each day.
